good game best mac game, it was all goof for the amount of zombies I played till i had some issues. The problem is every time I try to load ascention it crashes in the loading screen. It used to load just fine. so i uninstalled and verified the files and they still didnt work. I payed for this game and one of the dlc I was wondering If this will be fixed or if you know how I can fix it.. I bought a mac just so I could play this game!. The multiplayer is just awful. barely any servers to play in.. An actual call of duty game not some future. Everybody strap yourselves in cuz this is going to be one moderatley underwhelmingly lengthed and written review. Ok, here goes. First of all, im not much of a call of duty kinda person. I mean, ive always enjoyed it, but ive never really had the chance to play it and look at all the aspects of it, but not until now (DUH DUH DUUUUUUH). For the past 7 or 8 months or so, I have been an avid player of CS:GO, and decided I needed a break. Therefore, I sold my skins and bought this game. To be honest, im pleasently surprised at the quality of this port ive gotten. YES, the servers are only for mac players. YES, the graphics kinda stink YES, its a formulaic (that means its repetitive, guys) WTF IT COSTS \$40 HOWEVER. The loading times on this game are to be honest amazing for a mac. the game starts up in a few seconds, i can switch between single and multiplayer quickly, and I dont have to wait for anything. There is an option to give the shader a few seconds to warm up before you play, but you can easily turn it off and reduce the load time to a quarter of what it was. Graphics dont matter. Period. Macs are crap anyway, so expect it. It doesnt matter that its been done before, this game is still fun. Zombies and Multiplayer are both really fun, and yes, even singleplayer has its moments. I dont really have an excuse about the whole cost thing, and it is a bit much for an old game, but its the only one with zombies on it and i would personally pay \$20 just for zombies itself. (which i really kinda just sorta did.) And what i believe is the most important thing, is that it DOESN'T CRASH. In terms of it's relation to cs:go, Black Ops is a much higher quality port. CS:GO for mac crashes (from personal experience) about 3 times every 2 comp games. It is really nice to have gameplay which is not randomly interrupted to be banned from the ability to play the game for several days. Overall, I give it the numerical representation of the relationship between the two loveable characters Bert And Ernie on the high quality children's show Sesame Street. So basically, like a 6.5/10 for pc games and like a 9.5/10 for mac games. If you have the money and are willing to put at least like 40 hours into the game (which is very easy to do), then i call that worth it cuz 1\$=1 hour of loading screen free enjoyment.. its generally good but i cant get past the mission with the dossier in hue city. it keeps crashing after the heli blows something up. also ascention wont work on zombies.. I have mac version but cnt play on windows srsly m8. This game is POS!!! It crashes CONSTANTLY! Stream has been zero help and declined to offer a refund. I played it numerous hours but have been crashed out and had to start from the very beginning again and again and again and again. New activities have been maybe 10% of 20+ hours.
